TEACHINGTeaching at Wayne StateMentorship and Advising

1. Advisor for Houmehr Hojjat	
2. Advisor for Hani Rayess	
3. Advisor for Andrew Johnson	
4. Advisor for Vibhav Sekhsaria	
5. Mentoring for Quinton Mandle – WSU 1 st year Medical Student. Quinton spent time with me in the clinic and the operating room job shadowing. This gave him an in-depth look at the field.	November 4, 2016
6. Advisor for Daniel Liebertz, MD. Bleeding and SSRI's in Rhinoplasty,	2015

7. Advisor for Daniela Burchhardt M.D., A Novel Application of 3D Printing in Rhinoplasty Simulation, Wayne State University Department of Otolaryngology University of Michigan Bioengineering Lab, *I helped Dr. Burchhardt develop and submit a multi-center and multidisciplinary \$25,000 grant in hopes of using 3D printing in surgical simulation. I also serve as Daniela's academic mentor as she wishes to pursue a career in Facial Plastic and Reconstructive Surgery. The other projects I worked on with Dr. Burchhardt are:*
Bleeding and SSRI's in Rhinoplasty (Oral Presentation-COSM)
Acoustic and voice changes in reductive rhinoplasty patients (with Deb Simpson, Ross Mayerhoff, MD, present
8. Advisor for Peter Svider, MD. Age Related Facial Fractures. (*Oral Presentation-COSM*) present
9. Advisor for Amar Gupta, M.D, Areas for Improvement: Are Otolaryngology Residency Websites Sufficiently Informative? *I have assisted Dr. Gupta in the development of a schema to examine the factors and utility of otolaryngology program websites as they relate to applicant interest. This project has been presented as a poster presentation at both the local and national level. Dr. Gupta has also had his paper accepted for publication.* 2/2014-8/2014
10. Advisor for Peter Svider M.D and Andrew Johnson; *I have assisted these two residents on multiple projects (see publication list) investigating the educational experience as well as legal issues involved in various procedures in Otolaryngology. These two residents are perhaps the most eager and well-published I have ever seen. I have assisted them in study design and conceptualization throughout their many projects. I am proud that they are Wayne State Residents and have no doubt they will be leaders in academia in the future.* 2013-present
11. Advisor for Daniela Burchhardt, Trauma Patterns, Symptoms, and Complications Associated with External Auditory Canal Fractures. *I assisted Daniela in the conceptual design of this project and the data analysis. She has presented this research at both our Otolaryngology Scientific Forum as well as nationally. Publication in process of submission.* 5/2013-present
12. Advisor for John David, MSIV Trauma Patterns, Symptoms, and Complications Associated with External Auditory Canal Fractures. *I have assisted this medical student in his month long research rotation with me. He helped Dr Burchhardt gather and analyze data.* 5/2013-5/2014
13. Advisor for Daniel Liebertz M.D., The Consequences of Resident Case Unbundling on Future Billing Habits. *I helped Dr. Liebertz by conceptualizing the scenarios and engaging the faculty. We then used this QI project and developed a national on-line survey so as to examine whether our Otolaryngology residents are truly coding correctly. Publication in process of submission. I have also assisted Dr. Liebertz in career planning and as an educational mentor as he recently matched into Facial Plastics and Reconstructive Surgery Fellowship.* 4/2013-6/2015
14. Advisor for Ross Mayerhoff M.D., Tracheotomy Management Practices at a Community Hospital. *I worked hand-in hand with Ross developing this QI initiative. We attended multiple six-sigma and lean conferences to learn about process improvement. With my guidance Ross was able to get this project off the ground and has allowed for continuous improvement. He presented this project at our Otolaryngology Scientific Forum (OSF).* 1/2012-2014
15. Advisor for Zachary VandeGriend M.D., Use of Cyanoacrylate for Improved Stability in Endoscopic Brow Lifting. *I was able to garner funds for this project and I also conceptualized this multi-disciplinary study looking at the biomechanics of browlifting. I assisted Zach in the actual experiments as well. I served as Zachary's mentor as he was accepted into a Facial Plastic Fellowship at Mount Sinai and is currently a fellow there.* 2/2013-6/2014

16. Advisor for Michael Chen M.D., Vibhav Sekhsaria M.D., Angela Vong, M.D. and David Cohen M.D. Tracheotomy Management Practices at a Community Hospital. *I have assisted these residents in engaging hospital leadership and nursing to allow for improved teaching. We were able to institute an on-line reference and plan to continue this project at other local hospitals* 1/2012-present
17. Advisor for Sagar Patel M.D. A Novel Mathematical Approach to the Repair of Gauged Earlobes. *I assisted this resident in the conceptual design of the project. Publication expected and study ongoing.* 3/2014-present
18. Advisor for Gregory Kruper M.D and David Cohen M.D. Driving Safety of ENT Residents Taking Home Call. *This again stated as a QI project as I noticed many resident were getting into accidents or had some moving violation while driving on-call. This has grown into a Society wide initiative and is being endorsed by the Sections for Residents and Fellows of the AAO-HNS. Results from the study and survey will be used to assess whether further regulation is needed for resident safety. Dr. Kruper presented this study at our OSF and won the award for best resident project. He and Dr. Cohen will be presenting their findings at a national meeting in the near future.* 2/2014-6/2014
19. Advisor for Gergory Kruper M.D. and Zachary VandeGriend; Salvage of Failed Local and Regional Flaps with Porcine Urinary Bladder Extracellular Matrix Aided Tissue Regeneration. *I mentored these two residents as they assembled data and constructed the poster and paper that resulted from this research.* 2011-2013
20. Advisor for Danny Soares M.D., Impact of Storage Temperature on Efficacy and Longevity of Incobotulinumtoxin A in the Treatment of Crow's Feet. *Dr. Soares actually matched into the same Facial Plastics Fellowship at which I trained. We have stayed in contact over the past year and have collaborated on a research project examining as cosmetic neuromodulator.* current
21. Advisor for Danny Soares M.D. and Dennis Bojrab II M.D. Development of rhinoplasty self-assessment tool. *I helped guide these two residents in developing this way of attempting to standardize patients' perceptions of their nasal deformities. Data collection ongoing.* 2012-ongoing
22. Advisor for Kailash Narasimhan M.D., Ryan Scheuring, and Jamie Segel MD IV; The Extended Dorsal-Sheild Graft in Augmentation Rhinoplasty and Middle eastern rhinoplasty - an analysis of features, techniques, and results. *I assisted Dr. Narashimhan in both research projects that led to poster presentations and a publication. Ryan was an undergraduate student who helped and Jamie was a former medical student who analyzed and collected much of the data.* 2010-2011
23. Advisor for Lucio Pereira M.D., Maher Abu-Hamdan and Adriana Thibault; Stability of midface fracture repair using absorbable plate and screw system pilot holes drilled and pin placement at angles other than 90 degrees. *I provided research mentoring, obtained grant money and performed experiments alongside these residents and students. Publication resulted as well as two major state and national awards.* 2010-2011
